

Statistics

Waves

ns

nircat n = 7 retina pieces (technical replicates) from 5 mice
swcnt (negative control) n = 2 retina pieces from one mouse
3-14 waves averaged per trial, 1-3 trials per retina piece

nircat vs. zero

10000 bootstrapped samples:

Median: 0.6351940844685694

95% CI: 0.05651930588957967 2.3472387894039337

Mean of nircat: 0.8857106932164079

Standard deviation of nircat: 1.3593374706945238

Cohen's d: 0.6515752800986744

WilcoxonResult(statistic=4.0, pvalue=0.109375)

nircat vs. negative control

One mouse with pieces divided between both conditions:

mean	std
------	-----

condition

negative_control	-0.145825	0.353179
------------------	-----------	----------

nircat	0.635194	NaN
--------	----------	-----

MannwhitneyuResult(statistic=11.0, pvalue=0.16666666666666666)

Puffs

ns

K+ n = 7 retina pieces from 4 mice
ACSF n = 3 retina pieces from 3 mice
3 puffs averaged per trial, 1-6 trials per retina piece

nircat vs. zero

WilcoxonResult(statistic=0.0, pvalue=0.03125)

10000 bootstrapped samples:

Median: 2.804633210023445

95% CI: 2.3550569448712393 3.4244140158842686

nircat vs. ACSF puffs

MannwhitneyuResult(statistic=18.0, pvalue=0.011904761904761904)
